Ontario Council For Technology Education

OCTE 2010 Conference – Resources to Engage Students

Register now for this unique opportunity to gather Science and Technology teaching resources that will truly engage your elementary students.

We are excited to be able to offer unique workshops featuring creative lesson ideas and technological problem solving activities that are geared to **single and combined grade** classrooms in the Primary, Junior, and Intermediate divisions. Using easily obtained tools and materials, participants will have the opportunity to “make and take” hands-on activity samples that spark interest and promote creativity in students.

Don't miss these incredible workshops – we guarantee you will not walk away empty-handed!

On-line registration is now available at <http://www.octe.on.ca/>
